

C-UAS TRAINING KIT SELECTION GUIDE

Fixed-Wing UAS Threat Recognition, Characterization & Defeat Training

This guide compares all eight C-UAS Training Kit configurations to help you select the right package for your training mission. Each kit provides non-flying fixed-wing drone surrogates — static training aids not configured for flight — organized by training capability, not price point. All kits include receiving, inspection, labeling, import compliance, customs clearance, CONUS freight, and a digital training reference package.

Kit Name	SKU	Price	#	Cls	Focus	Best For
